

To Whom It May Concern:

My husband and I subscribe to Satellite Radio to enjoy the variety and quality of music, news, weather and traffic available. We regularly travel out of the range of our home radio stations and enjoy the ability to access weather and traffic in the area we are in or our home area. Please reject the NAB's petition 04-160 so that we may enjoy the type of programming that we currently have through XM Radio. Sincerely,

Christine Janson
